It is time to defund and dismantle the NSA!! They have proven themselves through repeated constitutional violations that they are not capable stewards of the trust that has been bestowed on them by America. It has become obvious that these violations are a part of their fabric and it is not possible to change this corporate mindset. Americans including myself have no trust in their leadership which has repeatedly lied to American's and our representatives. I think this needs to be one of this country's top priorities. The NSA has not only betrayed America, but they have alienated our allies, they have destroyed the future of cyber economics in the US due to lost trust by the rest of the world in America's ability to retain privacy.
