

ODNI Review Group Comments  
Mark P.

Dear Sir,

I'll make my comments brief. With regard to the NSA the answer is simple. Abolish this abomination, Court Martial both present and previous director and completely overhaul all remaining agencies including the FBI. They have clearly proven how untrustworthy they truly are. They are compulsive liars who are at war with the American public.

Over 60 plus years of domestic and international crimes. To put it bluntly, they fight the enemies they create at the expense of American freedom and our economic prosperity. I know beyond any doubt that a thorough review of actual accomplishments over the course of their lifetime would reveal agencies who are almost entirely a fraud. You have to ask the question, what useful purpose during the course of human history did they actually serve?

Even the former Soviet Union threat was a myth. While the former Soviets did pose a nuclear threat, it was an exaggerated threat. And in fact, little that we did actually brought down the former Soviet Union. As a CIA agent once said during a BBC interview, "the Soviet Union fell because it was a rotten system. Just leave them alone and they'll fall in a decade or two".

The answer for the NSA is simple. Abolish them and overhaul all remaining agencies. Near complete transparency, they can never be trusted again. What they did is an act of treason, they betrayed country and Constitution for their own power. The present and former director should both be Court Martialed.

And by the way, I'm someone who had to endure over two decades of highly intrusive surveillance and I know exactly how abusive this is. This is no longer a free country because of traitors like the NSA.

And one last comment for you to consider. If you lack the integrity and courage to abolish this agency, I can assure you we won't. The next generation will abolish them, we will crucify them in public. We will take them apart piece by piece and expose them for the traitors they've always been.

I would also request that the Executive issue an order, by penalty of Court Martial and prosecution, that the intelligence agencies should not destroy any evidence. As I'm sure you know, these agencies have a history of destroying evidence to cover up their crimes. If they are caught destroying evidence, the penalties should be extremely harsh.
