

Hemisphere

- Allows law enforcement the ability to quickly access AT&T's vast archive (up to the past ten years) worth of data from nearly all of the call routing equipment owned and operated by AT&T
- Originally developed as a classified project
- Hemisphere is an unclassified version funded by ONDCP and HIDTA
- Western Regional Hemisphere requests are processed by LACLEAR
- NCHIDTA will route your requests through LACLEAR

- The main uses for the information provided by Hemisphere are:
 - Finding dropped phones/new phones
 - Identifying potential DIO members
 - Retrieving records for foreign numbers
 - Determining location information
 - Receiving call detail records quickly
 - Automatic target deconfliction
