

All participants at the 32nd session of the WIPO SCCR in Geneva are cordially invited to attend

## Copyright in the Digital Environment:

### Innovative Solutions from Creators and Users

On Thursday, 12 May 2016 from 13:15 to 14:45 • Lunch will be provided to those attending

As WIPO begins to take a look more broadly at the future of copyright in the digital and online environment, what better time to bring together some of those who are proposing or developing novel solutions to the challenges of this transition, with the potential to benefit creators and users alike.

Acclaimed independent musician Imogen Heap will introduce the potential of blockchain technology for the future of music distribution, Marcos Alves de Souza will discuss the GRULAC paper on the digital environment, and Professor Sean Flynn will explain how balance in copyright can also promote creativity.

Imogen Heap, Grammy award nominated English singer-songwriter and composer

Marcos Alves de Souza, Director of Intellectual Rights of The Ministry of Culture of Brazil

Sean Flynn, Associate Director, Program on Information Justice and Intellectual Property, American University Washington
