

Dear U.S. Representatives,

Re: Oppose S.J. Res 34 - Repeal of FCC Privacy Rules

We, the undersigned founders, executives, and employees of ISPs and networking companies, spend our working lives ensuring that Americans have high-quality, fast, reliable, and locally provided choices available when they need to connect to the Internet. One of the cornerstones of our businesses is respecting the privacy of our customers, and it is for that primary reason that we are writing to you today.

We urge Congress to preserve the FCC's Broadband Privacy Rules and vote down plans to abolish them. If the rules are repealed, large ISPs across America would resume spying on their customers, selling their data, and denying them a practical and informed choice in the matter.

Perhaps if there were a healthy, free, transparent, and competitive market for Internet services in this country, consumers could choose not to use those companies' products. But small ISPs like ours face many structural obstacles, and many Americans have very limited choices: a monopoly or duopoly on the wireline side, and a highly consolidated cellular market dominated by the same wireline firms.

Under those circumstances, the FCC's Broadband Privacy Rules are the only way that most Americans will retain the free market choice to browse the Web without being surveilled by the company they pay for an Internet connection.

Signed,
