INTERESTS OF AMICI CURIAE

Amici States of New York, Connecticut, Delaware, Hawai‘i, Illinois, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Jersey, New Mexico, Oregon, Pennsylvania, Rhode Island, Vermont, Washington, and Wisconsin, and the District of Columbia file this brief in support of California’s opposition to plaintiffs’ motions for a preliminary injunction against enforcement of the California Internet Consumer Protection and Net Neutrality Act of 2018, Cal. Stats. 2018, ch. 976 (“SB 822”). Amici have a strong interest in defending the States’ sovereign right to exercise their police powers against unwarranted assertions of federal preemption. A critical aspect of the States’ sovereignty is the ability to pass laws aimed at “guard[ing] the lives and health of their citizens.” *License Cases*, 46 U.S. (5 How.) 504, 582-83 (1847). Our federalist system is designed to “allow the States great latitude under their police powers to legislate as to the protection of the lives, limbs, health, comfort, and quiet of all persons.” *Gonzalez v. Oregon*, 546 U.S. 243, 270 (2006) (quotation marks omitted). The States’ authority to protect their residents through robust consumer protection and public safety laws has long been considered a critical exercise of such historic police powers. *See Aguayo v. U.S. Bank*, 653 F.3d 912, 917 (9th Cir. 2011).

In this case, the United States and several telecommunications industry groups assert that broadband internet access service (BIAS) providers are uniquely entitled to immunity from state regulatory authority, even when they engage in activities that harm consumers and undermine public safety. To the contrary, a BIAS provider that chooses to offer goods or services in a State must comply with that State’s laws. And States have the historic police power to pass laws targeting industry-specific abuses occurring within their boundaries. Nothing in federal law disables the States from exercising such authority here. Over the years, amici have exercised their sovereign authority to promulgate and enforce numerous laws and regulations applicable to BIAS providers, including laws that, like SB 822, are aimed at protecting their residents from abusive business practices. And many amici successfully challenged the Federal Communications Commission (FCC)’s effort to preempt laws such as SB 822 by regulation. *See Mozilla Corp. v. FCC*, 940 F.3d 1 (D.C. Cir. 2019).

1 Amici have and intend to continue to exercise their police powers to protect their residents'
2 health, safety, and welfare by ensuring access to broadband internet without improper interference by
3 BIAS providers. Amici thus have a strong interest in opposing plaintiffs' unjustified attempt to curtail
4 the States' authority to enact and enforce state laws affecting BIAS providers, and support California in
5 opposing plaintiffs' motions to preliminarily enjoin the enforcement of SB 822.¹

6 **ARGUMENT**

7 **FEDERAL LAW DOES NOT CATEGORICALLY PREEMPT**
8 **STATE REGULATION OF INTERNET SERVICE PROVIDERS**

9 **A. States Are Entitled to Regulate the Business Practices of Internet**
10 **Service Providers Offering Services to Their Residents.**

11 “[B]ecause the States are independent sovereigns in our federal system,” preemption analysis
12 must begin “with the assumption that the historic police powers of the State were not to be superseded
13 by the Federal Act unless that was the clear and manifest purpose of Congress.” *Medtronic, Inc. v. Lohr*,
14 518 U.S. 470, 486 (1996) (quotation marks omitted). “[T]he purpose of Congress is the ultimate touch-
15 stone in every pre-emption case.” *Id.* at 485 (quotation marks omitted). “Preemption is always a matter
16 of congressional intent,” even in cases involving agency regulations. *Wachovia Bank, N.A. v. Burke*, 414
17 F.3d 305, 314 (2d Cir. 2005).

18 Congress expressly acknowledged and sought to preserve the effect of state laws that, like
19 SB 822, protect consumers and address unfair business practices by BIAS providers. In the Federal
20 Communications Act of 1934 (the Communications Act) and the Telecommunications Act of 1996 (the
21 1996 Act), Congress endorsed active, affirmative, and meaningful state regulation of communications
22 services, especially where such regulations fall within the States' traditional police powers. *See*
23 *generally* Philip Weiser, *Federal Common Law, Cooperative Federalism, and the Enforcement of the*
24 *Telecom Act*, 76 N.Y.U. L. Rev. 1692, 1694 (2001). Among other things, the Communications Act
25 preserves all state remedies available “at common law or by statute,” 47 U.S.C. § 414, and embraces
26 state authority in areas of traditional state concern—including state-law “requirements necessary to

27 ¹ Amici focus here on preemption with respect to fixed BIAS, but fully support California's
28 arguments with respect to why SB 822's provisions regarding mobile BIAS are not preempted. *See* Br.
for Defendants (Def. Br.) at 37-40.

1 preserve and advance universal service, protect the public safety and welfare, ensure the continued
2 quality of telecommunications services, and safeguard the rights of consumers,” *id.* § 253(b). *See also*
3 *id.* § 332(c)(3), (7). Congress reiterated its intent to preserve state regulation over communications
4 providers in section 601(c)(1) of the 1996 Act, stating explicitly that the 1996 Act could not impair or
5 modify state authority unless expressly provided. *See* Pub. L. No. 104-104, § 601(c)(1), 110 Stat. 56,
6 143 (1996) (codified at 47 U.S.C. § 152 note).

7 None of plaintiffs’ meritless theories of preemption override these plain expressions of
8 congressional intent to preserve rather than supplant state regulatory authority. First, the federal
9 plaintiffs contend that Congress expressly preempted all state regulation of interstate communications
10 in the Communications Act’s jurisdictional provisions. *See* Br. for United States (U.S. Br.) at 22-24
11 (citing 47 U.S.C. §§ 151 and 152). The industry plaintiffs likewise argue that the entire field of interstate
12 communications is preempted by federal law. *See* Br. for American Cable Association (ACA Br.) at 10-
13 13. Neither version of this argument can be reconciled with the applicable statutes or case law.

14 The federal plaintiffs’ express preemption argument has no basis in the text of the relevant
15 statutes. To be sure, sections 151 and 152 confer jurisdiction upon the FCC with respect to interstate
16 communications, while section 152(b) further denies the FCC jurisdiction over intrastate
17 communications. But statutory provisions defining the scope of a federal agency’s jurisdiction do not,
18 standing alone, displace state authority—and especially not with respect to exercises of the States’
19 historic police powers. *See English v. General Elec. Co.*, 496 U.S. 72, 87 (1990) (“[T]he mere existence
20 of a federal regulatory or enforcement scheme . . . does not by itself imply pre-emption of state
21 remedies.”). Accordingly, federal regulation of communications “in general, does not completely
22 preempt state law.” *MetropHONE Telecomms., Inc. v. Global Crossing Teles., Inc.*, 423 F.3d 1056, 1072-
23 73 & n.10 (9th Cir. 2005). The federal plaintiffs point to no specific language in the Communications
24 Act’s definitional provisions that is expressly preemptive. Indeed, these statutes focus entirely on federal
25 authority and are silent about state authority. In sharp contrast, other portions of the Communications
26 Act contain carefully cabined express preemption clauses pertaining to specific interstate
27

1 communications services. *See, e.g.*, 47 U.S.C. § 253(a). Those more specific preemption clauses would
2 be superfluous if the definitional provisions had already preempted all state regulation.

3 The industry plaintiffs’ field preemption argument is equally flawed. Field preemption requires
4 a showing that “federal law so thoroughly occupies a legislative field as to make reasonable the inference
5 that Congress left no room for the States to supplement it.” *Cipollone v. Liggett Group, Inc.*, 505 U.S.
6 504, 516 (1992) (quotation marks omitted). But as explained *supra* (at 2-3), far from crowding States
7 out of the field, Congress affirmatively embraced state authority over communications services in both
8 the Communications Act and the 1996 Act. And the States, including amici, have routinely exercised
9 their regulatory authority with respect to BIAS providers and other internet-based communications
10 services, as Congress intended. *See infra* at 8-12. The Ninth Circuit has expressly held that the extensive
11 role played by states in the regulation of interstate communications “preclude[s] a finding that Congress
12 intended to completely occupy the field.” *Ting v. AT&T*, 319 F.3d 1126, 1136-37 (9th Cir. 2003); *see*
13 *also In re NOS Commc’ns, MDL No. 1357*, 495 F.3d 1052, 1058 (9th Cir. 2007) (stating that the
14 Communications Act “is fundamentally incompatible with complete field preemption”). Other courts of
15 appeal have likewise rejected comparably sweeping claims of field preemption. *See, e.g., Johnson v.*
16 *American Towers, LLC*, 781 F.3d 693, 703 (4th Cir. 2015); *In re Universal Serv. Fund Tel. Billing*
17 *Practice Litig.*, 619 F.3d 1188, 1196 (10th Cir. 2010) (“[B]ecause state law expressly supplements
18 federal law in the regulation of interstate telecommunications carriers, field preemption does not
19 apply.”). Notably, these cases rejected field preemption in the context of state regulation of interstate
20 *telecommunications* services—services over which the FCC indisputably has more regulatory authority
21 than the “information service” at issue here.²

22 Plaintiffs are also wrong to suggest (ACA Br. at 2, 9-11, 13; U.S. Br. at 17-18 & n.2) that their
23 novel theories of express or field preemption were endorsed by the D.C. Circuit in *Mozilla*—a decision
24 that instead rejected the FCC’s attempt to preempt state regulatory authority. At issue in *Mozilla* was
25

26 ² As explained in California’s brief (at 8-9), the FCC in 2018 classified BIAS as an “information
27 service” subject to Title I of the Communications Act, rather than as a “telecommunications service”
28 subject to Title II. Unlike Title II, “Title I is not an independent source of regulatory authority”
California v. FCC, 905 F.2d 1218, 1240-41 n.35 (9th Cir. 1990).

1 the legality of a 2018 FCC order which, among other things, withdrew certain federal net neutrality
2 regulations and preempted “any state or local measures that would effectively impose rules or
3 requirements that [the FCC] repealed or decided to refrain from imposing in th[e] order or that would
4 impose more stringent requirements for any aspect of broadband service that [the FCC] address[ed] in
5 this order.” *See In re Restoring Internet Freedom*, 33 FCC Rcd. 311, 428 (2018) (“2018 Order”). While
6 the D.C. Circuit upheld other aspects of the order, it vacated the FCC’s preemption order in its entirety.
7 *Mozilla*, 940 F.3d at 74-86. *Mozilla* did not hold, as industry plaintiffs contend (ACA Br. at 9-10), that
8 the preemption order was unlawful only because it touched upon *intrastate* communications. Rather,
9 *Mozilla* found that the preemption order’s intrusion on state regulation of intrastate communications was
10 especially egregious because such “preemption treads into an area . . . over which Congress expressly
11 denied the Commission regulatory authority.” *Id.* at 78-79 (quotation & alteration marks omitted). But
12 *Mozilla* vacated the preemption order in its entirety, principally based on the conclusion that the FCC
13 has no “authority to displace state laws” regulating information services because the FCC has no
14 substantive regulatory authority over those services under Title I. *Id.* at 76. Moreover, *Mozilla* expressly
15 noted “the Communications Act’s vision of dual federal-state authority and cooperation in this area”
16 including with respect to state laws governing business practices and commercial dealings, “categories
17 to which broadband regulation is inextricably connected.” *Id.* at 81. Thus, neither the relief nor the
18 reasoning of *Mozilla* was limited to intrastate communications.

19 Plaintiffs’ conflict preemption arguments fare no better. Conflict preemption requires a showing
20 that state law “actually conflicts with federal law.” *Pacific Gas & Elec. Co. v. State Energy Res.*
21 *Conservation & Dev. Comm’n*, 461 U.S. 190, 204 (1983). More specifically, a defendant must
22 demonstrate either that “it is impossible for a private party to comply with both state and federal
23 requirements,” *English*, 496 U.S. at 79, or that the application of state law is “an obstacle to the
24 accomplishment and execution of the full purposes and objectives of Congress,” *Wyeth v. Levine*, 555
25 U.S. 555, 577 (2009) (quotation marks omitted). Neither standard is met here.

26 Conflict “[p]re-emption is ordinarily not to be implied absent an ‘actual conflict.’” *English*, 496
27 U.S. at 90 (emphasis added). This principle “enjoins seeking out conflicts between state and federal
28

1 regulation where none clearly exists.” *Id.* (quotation and alteration marks omitted). As explained in
2 California’s brief (at 14-27), the 2018 Order cannot itself serve as the basis for conflict preemption
3 because that order reflects the FCC’s *absence* of regulatory authority over BIAS resulting from the
4 agency’s reclassification decision. The 2018 Order “is not an instance of affirmative deregulation, but
5 rather a decision by the FCC that it lacked authority to regulate in the first place.” *ACA Connects—Am. ’s*
6 *Commc’ns Ass’n v. Frey*, 20-cv-00055, No. 2020 WL 3799767, at *4 (D. Me. July 7, 2020). “[T]he
7 FCC’s abdication of authority” does not have preemptive effect and cannot be the basis of an
8 impermissible conflict. *Id.*

9 It is immaterial that the 2018 Order was motivated by the FCC’s current policy objective of
10 immunizing BIAS providers from regulation through a purported “light touch” framework. ACA Br. at
11 18-23; U.S. Br. at 18. The Supreme Court has been clear that a national policy of deregulation cannot
12 be enacted silently or by administrative fiat. The preemption of state laws represents “a serious intrusion
13 into state sovereignty.” *Virginia Uranium, Inc. v. Warren*, 139 S. Ct. 1894, 1904 (2019) (op. of Gorsuch,
14 J.) (quotation marks omitted). Accordingly, “any [e]vidence of pre-emptive purpose, whether express
15 or implied, must therefore be sought in the text and structure of the *statute* at issue.” *Id.* at 1907 (op. of
16 Gorsuch, J.) (emphasis added) (quotation marks omitted). “Without a [statutory] text that can . . .
17 plausibly be interpreted as *prescribing* federal preemption it is impossible to find that a free market was
18 mandated by federal law.” *Puerto Rico Dep’t of Consumer Affairs v. Isla Petroleum Corp.*, 485 U.S.
19 495, 501 (1988) (emphasis added). Plaintiffs point to no such text here.

20 As an initial matter, the classification of BIAS as an information service is not mandated by
21 Congress. Indeed, the D.C. Circuit has previously found that the statutory definitions governing
22 classification support the treatment of BIAS as a telecommunications service subject to extensive
23 regulation under Title II. *See United States Telecom Ass’n v. FCC*, 825 F.3d 674, 701-06 (D.C. Cir.
24 2015). To be sure, the D.C. Circuit has also upheld the reclassification of BIAS as an information service
25 in light of the ambiguity in the relevant statutes. *Mozilla*, 940 F.3d at 23-35. But statutory ambiguity
26 cannot evidence Congress’s intent to preempt state law, and therefore cannot overcome the presumption
27 against preemption. *See Sikkelee v. Precision Airmotive Corp.*, 822 F.3d 680, 693 (3d Cir. 2016). The
28

1 FCC’s own “unenacted approvals, beliefs, and desires” with respect to classification are insufficient to
2 preempt. *See Isla Petroleum*, 485 U.S. at 501.

3 Moreover, there is no evidence that Congress intended to preempt state regulation of information
4 services, even if it had intended to subject information services to fewer regulations on the federal level.
5 Congress is well aware of how to preempt state laws. For example, while the 1996 Act expressly
6 authorizes preemption with respect to certain types of state regulation of *telecommunications* services,
7 *see, e.g.*, 47 U.S.C. § 253(a), the Act includes no such provision regarding *information* services. And in
8 section 601(c)(1) of the 1996 Act, Congress provided that there should be “no implied effect” from the
9 provisions of the 1996 Act, and that the legislation should not be construed “to modify, impair, or
10 supersede Federal, State, or local law unless expressly so provided.” Pub. L. No. 104-104, 110 Stat. at
11 143. As then-FCC Commissioner (and now Chairman) Ajit Pai noted in 2015, “section 601(c) counsels
12 against any broad construction of the 1996 Act that would create an implicit conflict with state law.” *In*
13 *re City of Wilson*, 30 FCC Rcd. 2408, 2512 (2015) (dissenting statement) (quotation and alteration marks
14 omitted), *order rev’d*, *Tennessee v. FCC*, 832 F.3d 597 (6th Cir. 2016). As California explains in its
15 brief (at 28-29), section 601(c)(1) thus “precludes an inference that state regulation of ‘information
16 services’ is impliedly preempted.”

17 Plaintiffs also erroneously argue that the Communications Act precludes the States from
18 imposing “common carrier” regulations on information services. *See* ACA Br. at 14-18 (citing 47 U.S.C.
19 § 153(51)); U.S. Br. at 22. Section 153(51) provides that the FCC may impose common carrier
20 regulations on such an entity “only to the extent that [a carrier] is engaged in providing
21 telecommunications services.” In *Verizon v. FCC*, the D.C. Circuit interpreted this statute to bar the FCC
22 from imposing regulations on information services that would prohibit blocking, throttling, and paid
23 prioritization. 740 F.3d 623, 656 (D.C. Cir. 2014). But Congress’s apparent decision to bar *the FCC*
24 from promulgating certain types of regulations with respect to information services does not, standing
25 alone, prohibit *the States* from so acting. Because the States “entered the federal system with their
26 sovereignty intact,” *Blatchford v. Native Vill. of Noatak*, 501 U.S. 775, 779 (1991), they do not require
27 Congress’s authority or approval to exercise their historic police powers. *See Graham v. R.J. Reynolds*

1 *Tobacco Co.*, 857 F.3d 1169, 1190 (11th Cir. 2017) (“Although federal agencies have only the authority
 2 granted to them by Congress, states are sovereign.”). As sovereigns, States have their own inherent
 3 police powers to protect consumers, promote public health and safety, and regulate businesses operating
 4 within their borders. A “clear and manifest purpose” to preempt a state law that derives from the State’s
 5 own sovereign authority cannot be derived solely from a congressional decision to strip a federal agency
 6 of jurisdiction. *Id.* at 1191.

7 **B. Plaintiffs’ Sweeping Theories of Preemption Would Undermine**
 8 **the States’ Ability to Protect Consumers**

9 Plaintiffs ask this Court to recognize a sweeping preemption of state regulation that would leave
 10 BIAS almost completely unregulated, notwithstanding Congress’s recognition of “broadband as a
 11 critical public infrastructure, increasingly important to the nation’s economic development.” Lennard
 12 G. Kruger et al., *The National Broadband Plan 1* (Cong. Research Serv. July 2010). It is inconceivable
 13 that Congress would silently block States from regulating BIAS—a service that it has described as
 14 fundamental to, among other things, “consumer welfare, civic participation, public safety and homeland
 15 security, community development, health care delivery, energy independence and efficiency, education,
 16 worker training, private sector investment, entrepreneurial activity, job creation and economic growth.”
 17 *See* American Recovery and Reinvestment Act of 2009, Pub. L. No. 111-5, § 6001(k)(2)(D), 123 Stat.
 18 115, 516. And the consequences of leaving BIAS unregulated would be especially stark now, as millions
 19 of Americans are entirely dependent on broadband internet access to work, study, and obtain food and
 20 other essential goods in light of the COVID-19 pandemic.

21 Contrary to plaintiffs’ representations, BIAS providers are not entitled to special status among
 22 businesses offering goods or services in the States. States have ample authority to prohibit or regulate
 23 business practices by BIAS providers that harm consumers or jeopardize public health and safety.
 24 Several States have appropriately relied on this authority to promulgate net neutrality statutes, many of
 25 which plaintiffs have not challenged.³ Maine, Nevada, and Minnesota have all enacted laws that require

26
 27 ³ *See, e.g.*, Ch. 210, 2019 Colo. Laws; 5 Me. Rev. Stat. Ann. § 1541-B; Ch. 88, 2018 Or. Laws;
 28 No. 169, 2018 Vt. Acts & Resolves; Wash. Rev. Code ch. 19.385. More than twenty other States
 introduced net neutrality legislation in the 2020 legislative sessions alone. *See* Nat’l Conf. of State

1 BIAS providers to obtain permission from consumers before sharing data such as their web browsing
 2 history, application usage, or geographic location,⁴ while other States have extended their data privacy
 3 laws to BIAS providers.⁵ These types of regulations are akin to many other types of tailored industry-
 4 specific laws that States have enacted to protect the public.⁶

5 In addition to legislation, States have also used enforcement actions to police unfair, deceptive,
 6 or otherwise harmful business practices by internet service providers. In 2007, for example, 48 States
 7 and the District of Columbia reached a \$3 million settlement agreement with America Online (AOL)
 8 regarding the company's cancellation policies, which had made it extremely challenging for customers
 9 to cancel their service. As part of the agreement, AOL was required to reform its cancellation practices
 10 and issue refunds to consumers who continued to be charged fees after trying to cancel their services.⁷
 11 In 2018, New York reached a \$174 million settlement agreement with Charter Communications in a
 12 lawsuit involving the company's misrepresentations about the speed and reliability of their internet
 13 service.⁸ Notably, Charter settled the case after unsuccessfully moving to dismiss the State's claims as
 14 preempted. *See People v. Charter Commc'ns, Inc.*, 162 A.D.3d 553 (N.Y. App. Div. 2018) (FCC
 15 regulation "does not preempt state laws that prevent fraud, deception and false advertising" (quotation

 internet, URLs are listed in the table of authorities. All sites were last visited September 30, 2020.)

18 ⁴ See 35-A Me. Rev. Stat. Ann. § 9301; Minn. Stat. ch. 325M; Nev. Rev. Stat. § 205.498. More
 19 than a dozen States are considering comparable legislation. *See Nat'l Conf. of State Legs., 2019-20*
Privacy Legislation Related to Internet Service Providers (June 29, 2020) (internet).

20 ⁵ See, e.g., 815 Ill. Comp. Stat. 530/1 et. seq. (requiring data collector whose security system
 21 has been breached to notify Illinois Attorney General); 66 Pa. Cons. Stat. § 3019(d)(1) (prohibiting
 carriers from disclosing "information relating to any customer's patterns of use, equipment and
 network information and any accumulated records about customers" except name, address, and
 telephone number).

22 ⁶ See, e.g., Conn. Gen. Stat. § 21a-217 (health club contracts); Del. Code Ann. tit. 6, ch. 24A
 23 (debt management services); Md. Code Ann., Com. Law § 14-3301 et. seq. (immigration consultants);
 940 Mass. Code Regs. pt. 19 (retail marketing and sale of electricity); Minn. Stat. § 325F.693
 24 (prohibiting telephone companies from slamming); N.J. Stat. Ann. § 49:3-53 (investment advisers);
 Or. Rev. Stat. § 646A.800 (regulating late fees for cable service); 37 Pa. Code ch. 301 (automotive
 industry trade practices).

25 ⁷ Press Release, National Ass'n of Att'ys Gen., *Attorneys General Announce Settlement with*
 26 *America Online Regarding Cancellation Issues* (July 12, 2007) (internet).

27 ⁸ Press Release, N.Y. Office of the Att'y Gen., *A.G. Underwood Announces Record \$174.2*
 28 *Million Consumer Fraud Settlement with Charter for Defrauding Internet Subscribers* (Dec. 18, 2018)
 (internet).

marks omitted)). Following the Charter settlement, New York reached agreements with four other BIAS providers—Altice, Frontier Communications, RCN, and Verizon—to reform their marketing and business practices regarding internet speed claims.⁹ In March 2020, Pennsylvania reached a settlement agreement with Frontier involving similar allegations of false and deceptive speed claims.¹⁰ Washington State has likewise brought numerous enforcement actions against major BIAS providers, including Charter, Comcast, Century Link, and Frontier, involving, among other things, claims of hidden or misleading fees.¹¹ In December 2019, Colorado and Oregon reached separate settlements with Century Link regarding the company’s abusive marketing practices, including hidden fees and failure to provide promised discounts and refunds.¹²

Plaintiffs’ preemption arguments would threaten such traditional and reasonable regulation of internet-based businesses. The 1996 Act’s definition of “information service” could include not only BIAS providers but also entities such as email providers, text messaging systems, VoIP providers, video conferencing services, online gambling platforms, websites, and more.¹³ Taken to its logical conclusion, plaintiffs’ argument would preclude the States from regulating anything about these businesses because a federal agency purportedly desired a “light-touch approach” for all information services. *See* ACA Mem. at 6; U.S. Br. at 18. Plaintiffs offer no limiting principle that would avoid this absurd result, and the potential consequences of accepting plaintiffs’ arguments could be substantial.

Office of the Att’y Gen., *Attorney General Phil Weiser Announces CenturyLink Will Pay \$8,476,000 for Charging Hidden Fees, Overbilling Colorado Customers* (Dec. 19, 2019) (internet); Press Release, Or. Office of the Att’y Gen., *AG Rosenblum Announces \$4 Million Settlement with CenturyLink* (Dec. 31, 2019) (internet).

¹³ *See, e.g., Petitions for Declaratory Ruling on Regulatory Status of Wireless Messaging Service*, 33 FCC Rcd. 12075 (2018) (classifying text messaging as information service).

1 States have passed numerous statutes and regulations addressed at the business practices of
 2 internet-based companies where those practices could potentially harm consumers or threaten public
 3 safety. Approximately twenty States have statutes or regulations governing daily fantasy sports games,
 4 which are provided over the internet or by smartphone application to customers in particular States.¹⁴
 5 Six States have legalized online casino gaming subject to affirmative state regulation, and several others
 6 are actively considering such legislation.¹⁵ Many States have laws aimed at other types of electronic
 7 practices and internet-based industries. For example, Massachusetts regulates public virtual schools
 8 “whose teachers primarily teach from a remote location using the internet or other computer-based
 9 methods.”¹⁶ Delaware’s “Safe Internet Pharmacy Act” regulates internet sites that dispense prescription
 10 drugs to patients within the State.¹⁷ Illinois requires internet-based dating, child care, senior care, and
 11 home care services to disclose whether they perform criminal background checks on candidates listed
 12 on their sites and, if so, what types of background checks.¹⁸ Multiple states including California,
 13 Connecticut, Delaware, Nevada, and Oregon have statutes governing the privacy policies and practices
 14 for websites or other online services.¹⁹ California and Delaware also have specific statutes governing
 15 children’s online privacy.²⁰

16 States also routinely use their enforcement authority to regulate harmful business practices
 17 engaged in by internet-based companies. In 2006, Florida, Illinois, Massachusetts, Michigan, North
 18 Carolina, and Texas entered into a settlement agreement with Vonage regarding the company’s failures
 19

27 ¹⁹ *See* Cal. Bus. & Prof. Code §§ 22575-22578; Cal. Civ. Code §§ 1798.130(a)(5),
 1798.135(a)(2)(A); Conn. Gen. Stat. § 42-471; Del. Code Ann. tit. 6, ch. 12C; Nev. Rev. Stat.
 § 603A.340; Or. Rev. Stat. § 646.607.

28 ²⁰ *See* Cal. Bus. & Prof. Code §§ 22580-22582; Del. Code Ann. tit. 6, ch. 12C.

1 to adequately disclose limitations in its 9-1-1 service provided through VoIP.²¹ In 2009, 32 States
 2 reached a \$3 million settlement with Vonage that required the company to change its marketing and
 3 cancellation policies with respect to VoIP service.²² In 2013, 37 States and the District of Columbia
 4 reached settlements with Google regarding data and privacy abuses.²³ In 2016, Massachusetts obtained
 5 a preliminary injunction against an online auto title lender who had been making and collecting on illegal
 6 short-term loans in violation of state usury laws.²⁴ In May 2020, New York reached an agreement with
 7 Zoom Video Communications to provide security protections for users of its video conference
 8 platform.²⁵ In September 2020, Michigan reached a settlement with All Access Telecom, Inc., requiring
 9 that the VoIP provider substantially alter its practices with respect to robocalls.²⁶

10 These are only a few examples of the critical state regulation and enforcement that could be
 11 jeopardized by plaintiffs’ sweeping preemption theories. What these examples confirm is that the
 12 internet and internet-based services are integral to how people live, work, study, and entertain
 13 themselves. State regulation of BIAS is an example of the States’ routine exercise of their historic police
 14 powers to protect consumers and ensure public safety. And contrary to plaintiffs’ claims here, those
 15 powers have not been displaced by federal law.
