1 **INTEREST OF AMICI CURIAE**

2 *Amici* are law professors who write about and teach internet law.¹ *Amici* take no or
3 varying positions on the merits of California’s SB 822, the “California Internet Consumer
4 Protection and Net Neutrality Act of 2018.” But they have a shared interest in ensuring the proper
5 balance between state and federal internet regulation that affects not only internet access but also
6 the full range of consumer protections for other online services that states like California may
7 extend to their citizens. *Amici* submit this brief to articulate their scholarly view of the proper
8 reach of federal preemption of interstate communications. *Amici* are (institutions are listed for
9 identification purposes only):

10 **Michael J. Burstein**, Vice Dean and Professor of Law, Cardozo Law School;

11 **Brett M. Frischmann**, Charles Widger Endowed University Professor in Law, Business
12 and Economics, Villanova University;

13 **Chris Jay Hoofnagle**, Professor of Law *In Residence*, University of California, Berkeley,
14 School of Law;

15 **Lawrence Lessig**, Roy L. Furman Professor of Law and Leadership, Harvard Law
16 School;

17 **Pamela Samuelson**, Richard M. Sherman Distinguished Professor of Law, University of
18 California, Berkeley, School of Law;

19 **Jason M. Schultz**, Professor of Clinical Law, New York University School of Law; and

20 **Barbara van Schewick**, Professor of Law and (by Courtesy) Electrical Engineering,
21 Helen L. Crocker Faculty Scholar, Stanford Law School.

22 **INTRODUCTION**

23 Plaintiffs argue that SB 822 is preempted because this is one of those “rare cases” in
24 which “Congress has ‘legislated so comprehensively’ in a particular field that it ‘left no room for
25 supplementary state legislation.’” *Kansas v. Garcia*, 140 S. Ct. 791, 804 (2020) (quoting *R.J.*

26 _____
27 ¹ *Amici* certify that that no counsel for a party authored this brief in whole or in part, and
28 no person other than amici or their counsel made a monetary contribution intended to fund the
preparation or submission of this brief.

1 *Reynolds Tobacco Co. v. Durham County*, 479 U.S. 130, 140 (1986)). “In order to determine
2 whether Congress has implicitly ousted the States from regulating in a particular field, [courts]
3 must first identify the field.” *Id.* Both the United States and the ISP Plaintiffs identify the field as
4 “interstate communications.” US Br. at 22; ISP Br. at 10-11. This is a sweeping claim. If
5 accepted, it would bar the states from regulating broad areas of traditional local concern—
6 including protecting consumers, public health, and public safety—with respect to providers of
7 interstate communications. In many cases, such preemption would leave both the FCC and the
8 states without authority to regulate. Neither the “text and structure of the statute at issue,” *Kansas*,
9 140 S. Ct. at 804 (quoting *CSX Transp., Inc. v. Easterwood*, 507 U.S. 658, 664 (1993)), nor the
10 long history of judicial decisions interpreting the scope of federal preemption under the
11 Communications Act of 1934 (“Communications Act” or “Act”) supports the Plaintiffs’ argument
12 that the federal government has claimed the exclusive right to regulate all aspects of interstate
13 communication. Even if the Plaintiffs’ claim were to be limited to “interstate information
14 services,” which it does not appear to be, that narrower field is still not subject to “a framework of
15 regulation so pervasive that Congress left no room for the States to supplement it.” *Arizona v.*
16 *United States*, 567 U.S. 387, 399 (2012) (internal quotation marks and alterations omitted).

17 ARGUMENT

18 I. THE COMMUNICATIONS ACT DOES NOT PREEMPT THE FIELD OF 19 INTERSTATE COMMUNICATIONS

20 Plaintiffs attempt to manufacture preemption from the Communications Act’s grant of
21 jurisdiction over interstate communications to the FCC. But there is nothing in the Act that
22 suggests that jurisdiction is exclusive as to the entire field, and much to affirm that it is not. Like
23 most federal laws, the Act leaves intact the states’ preexisting police powers – the “broad
24 authority to enact legislation for the public good.” *Bond v. United States*, 572 U.S. 844, 854
25 (2014). The states’ exercise of these powers is, of course, limited by express preemption – in the
26 Act itself or through FCC actions within the scope of its delegated authority; by ordinary
27 principles of field (with respect to certain narrower fields) and conflict preemption, as applicable;
28 and by the Dormant Commerce Clause.

1 **A. The Communications Act’s grant of federal authority to regulate interstate**
 2 **communications does not divest the states wholesale of their own ability to**
 3 **regulate**

4 The Communications Act grants the FCC authority to regulate interstate communications.
 5 Plaintiffs contend that this statutory authorization simultaneously ousts the states from regulating
 6 in the field. But the Supreme Court has long held that authority to regulate does not, standing
 7 alone, give rise to preemption. *See, e.g., Hillsborough County, Fla. v. Automated Med. Labs.,*
 8 *Inc.*, 471 U.S. 707, 714 (1985) (holding that FDA authority to regulate does not preempt the
 9 field); *New York State Dep’t of Social Servs. v. Dublino*, 413 U.S. 405, 415 (1973) (“We
 10 reject...the contention that pre-emption is to be inferred merely from the comprehensive character
 11 of the [regulatory scheme.]”); *see also Kurns v. Railroad Friction Prods. Corp.*, 565 U.S. 625,
 12 638 (2012) (Kagan, J., concurring) (noting that “[u]nder our more recent cases,” “Congress must
 13 do much more to oust all of state law from a field” than “grant[] regulatory authority over that
 14 subject matter to a federal agency”). Instead, the “text and structure” of the Act belie any claim
 15 that the statute impliedly preempts the entire field of “interstate communications.”

16 Contrary to the federal government’s argument (US Br. at 22), §§ 151 and 152 of the
 17 Communications Act, 47 U.S.C. §§ 151, 152, do not suggest that Congress intended federal law
 18 to occupy the entire field of interstate communications. Section 151 is a bare statement of policy,
 19 which describes the Act’s “purpose of regulating interstate and foreign commerce in
 20 communication by wire and radio.” *See Comcast Corp. v. FCC*, 600 F.3d 642, 652 (D.C. Cir.
 21 2010) (holding that § 151 is a “statement of policy that . . . delegate[s] no regulatory authority”).
 22 Section 152(a) defines the scope of the Act, stating that the Act’s provisions “shall apply to all
 23 interstate and foreign communication by wire or radio.” Similarly, § 152(b) is a limitation on the
 24 FCC’s jurisdiction, precluding it from regulating intrastate communications except in certain
 25 circumstances.² None of these provisions can be read to suggest that any authority they convey is

25 ² The United States asserts that its preemption argument can be “understood as a form of
 26 express preemption, with the Communications Act explicitly precluding state regulation over
 27 interstate communications.” US Br. at 23. The government provides no support for this assertion.
 28 Nor can it. Sections 151 and 152 say nothing about preemption. As described above, that
 statutory silence does not even give rise to an *inference* of preemption; it certainly does not
 constitute an expression of preemption.

1 to be exclusive of the states. Similarly, none of the cases that Plaintiffs cite to interpret these
 2 provisions holds that they work to preempt the entire field of “interstate communications.”
 3 Instead, they merely use §§ 151-152 to describe the reach of the FCC’s *jurisdiction*, while
 4 reaching far more limited preemption holdings,³ or no preemption holdings at all.⁴

5 This reading of the statutory text is supported by the structure of the Communications Act.
 6 There *are* some aspects of interstate communications that Congress has seen fit to regulate
 7 pervasively. When the FCC applies Title II tariff regulations to common carriers for example, it
 8 arguably preempts the field of ratemaking with respect to those carriers’ services. *See, e.g., Ivy*
 9 *Broad.*, 391 F.2d at 490. But even in those cases, courts have been careful to delimit the scope of
 10 field preemption. In *Ivy Broadcasting*, the Court held only that “the *duties, charges and liabilities*
 11 *of telegraph or telephone companies with respect to interstate communications are to be governed*
 12 *solely by federal law.*” 391 F.2d at 491 (emphasis added). The “liability of communications
 13 carriers [i.e., of “common carriers,” 47 § U.S.C. 153(11)] with respect to interstate services,” *id.*
 14 at 492, is far narrower than the whole of “interstate communications.”

15 Indeed, courts interpreting the Communications Act have been skeptical of field
 16 preemption claims in much narrower fields narrower than “interstate communications.” In *Head*
 17 *v. New Mexico Board of Examiners in Optometry*, 374 U.S. 424 (1963), the Supreme Court
 18 rejected field preemption of radio broadcast—a subset of interstate communications—despite the
 19 broad and comprehensive authority granted the FCC to issue broadcast licenses. *See id.* at 429-32.

20 _____
 21 ³ A number of cases uphold express preemption decisions by the FCC based on its
 22 statutory authority (as opposed to claims of field preemption arising from the Act). *See, e.g.,*
 23 *Capital Cities Cable, Inc v. Crisp*, 467 U.S. 691, 701-02 (1984) (express preemption by FCC
 24 based on ancillary authority); *State Corp. Comm’n of Kan. v. FCC*, 787 F.2d 1421, 1427 (10th Cir.
 25 1986) (express preemption by FCC based on direct authority); *NARUC v. FCC*, 746 F.2d 1492,
 26 1498-1501 & n.6 (D.C. Cir. 1984) (express preemption by FCC based on authority over interstate
 27 telecommunications services). Others find field preemption of different, much narrower fields
 28 that are more pervasively regulated than the field of interstate communications. *See, e.g., Ivy*
Broad. Co. v. AT&T Co., 391 F.2d 486, 490 (2d Cir. 1968) (field preemption of tariff filing
 requirements for interstate telephone services); *Postal-Tel. Cable Co. v. Warren-Godwin Lumber*
Co., 251 U.S. 27 (1919) (field preemption of interstate business of telegraph companies under
 Mann-Elkins Act of 1910); *Western Union Tel. Co. v Boegli*, 251 U.S. 315 (1920) (same).

⁴ *E.g., Worldcom, Inc. v. Graphnet, Inc.*, 343 F.3d 651, 654 (3d Cir. 2003) (federal
 question jurisdiction over contract dispute between telecommunications carriers).

1 More recently, the Ninth Circuit has held that the field of online video closed captioning is not
2 preempted despite extensive regulation of television and online captioning. *See Greater L.A.*
3 *Agency on Deafness, Inc. v. Cable News Network, Inc.*, 742 F.3d 414, 428-29 (9th Cir. 2014)
4 (*GLAAD*). To the same effect are *Metrophones Telecommunications, Inc. v. Global Crossings*,
5 423 F.3d 1056, 1072 (9th Cir. 2005), with respect to payphones, and *Ting v. AT&T*, 319 F.3d
6 1126, 1136-37 (9th Cir. 2003), with respect to long-distance consumer contracts. If federal law
7 does not preempt those narrow fields—radio broadcast, online video captioning, payphones, and
8 long-distance contracts—then *a fortiori* it does not preempt the broader field of interstate
9 communications.

10 The Communications Act, moreover, does not pervasively regulate *all* aspects of interstate
11 communications. Plaintiffs thus cannot show that “the mere volume and complexity of federal
12 regulations demonstrate an implicit congressional intent to displace all state law” in the field.
13 *Aguayo v. U.S. Bank*, 653 F.3d 912, 918 (9th Cir. 2011). Some aspects of interstate
14 communications are subject to little or no affirmative regulation. It has long been established, and
15 the court in *Mozilla Corp. v. FCC*, 940 F.3d 1 (D.C. Cir. 2019), reaffirmed, that the FCC’s
16 “ancillary authority” to fill these gaps where it lacks express authority to regulate is limited. *See*
17 *id.* at 75-76 (citing *California v. FCC*, 905 F.2d 1217 (9th Cir. 1990)). Outside of regulating
18 telecommunications services (Title II of the Act), radio transmissions (Title III), or cable services
19 (Title VI), the FCC has no “independent source of regulatory authority.” *California*, 905 F.2d at
20 1240 n.35. Instead, in areas of interstate communications not covered by those sections of the
21 Act, such as cable services prior to the enactment of Title VI, *see United States v. Midwest Video*
22 *Corp.*, 406 U.S. 649 (1972), the FCC can only act to the extent that doing so “is reasonably
23 ancillary to the Commission’s effective performance of its statutorily mandated responsibilities.”
24 *Mozilla*, 940 F.3d at 76 (quotation marks omitted).

25 Because the authority to preempt is the flip side of the authority to regulate, *see Mozilla*,
26 940 F.3d at 75 (“[I]n any area where the Commission lacks the authority to regulate, it equally
27 lacks the power to preempt state law.”), the scope of the FCC’s ancillary authority has often been
28 determined in the context of preemption disputes. In *National Association of Regulatory Utility*

1 *Commissioners v. FCC*, 533 F.2d 601 (D.C. Cir. 1976) (*NARUC II*), for example, the court
 2 vacated the FCC’s preemption of state regulations of two-way, non-video uses of cable systems,
 3 because the FCC lacked ancillary authority to regulate these services. If the Act actually
 4 preempted the field of interstate communications, the court would have upheld the preemption of
 5 state regulation of the interstate aspects of these services.⁵ *See also California*, 905 F.2d at 1240
 6 n.35; *Computer & Comm’n’s Indus. Ass’n v. FCC*, 693 F.2d 198, 214-18 (D.C. Cir. 1982);
 7 *Comcast*, 600 F.3d at 650-51, 653, 654-658 (discussing and affirming cases); Brief of Professors
 8 of Communications Law as Amici Curiae in Support of Petitioners 6-10, 18-21, *Mozilla Corp. v.*
 9 *FCC*, 940 F.3d 1 (D.C. Cir. 2019) (Nos. 18-1051 et al.) (discussing cases) [Mozilla Professors’
 10 Br.]. The careful examination of ancillary authority in these cases would have been unnecessary if
 11 the Act already preempted the field of interstate communications.

12 Finally, the fact that Congress chose pervasively to regulate only some but not all aspects
 13 of interstate communications suggests that Congress did not intend federal law to occupy the
 14 field. Quite the opposite, it suggests that Congress knew how to engage in pervasive regulation
 15 and affirmatively chose not to do so with respect to the entire field of interstate communications.
 16 It is not for courts to “adopt a court-made rule to supplement federal statutory regulation that is
 17 comprehensive and detailed; matters left unaddressed in such a scheme are presumably left
 18 subject to the disposition provided by state law.” *O’Melveny & Myers v. FDIC*, 512 U.S. 79, 85
 19 (1994).

20 **B. States’ long-established role regulating interstate communications belies any**
 21 **claim to field preemption**

22 The Communications Act has long incorporated a “vision of dual federal-state authority
 23 and cooperation” in interstate communications, *Mozilla*, 940 F.3d at 81, that precludes a finding
 24 of field preemption. “Where coordinate state and federal efforts exist within a complementary
 25 administrative framework, and in the pursuit of common purposes, the case for federal pre-

26 ⁵ The majority in *NARUC II* held that the entire preemption was invalid because it was not
 27 “reasonably ancillary” to the FCC’s statutory responsibilities. *Id.* at 612-614, 621-622. Only one
 28 judge found that the FCC also lacked authority to preempt because it was preempting state
 regulation of intrastate services. *Contra id.* at 621-23 (Lumbard, J., concurring).

1 emption becomes a less persuasive one.” *Dublino*, 413 U.S. at 421

2 For one thing, numerous provisions of the Act specifically preserve a role for the states in
3 interstate communications. *See, e.g.*, 47 U.S.C. §§ 253(b) (“Nothing in this section shall affect the
4 ability of a State to impose . . . requirements necessary to preserve and advance universal service,
5 protect the public safety and welfare, ensure the continued quality of telecommunications
6 services, and safeguard the rights of consumers”), 253(c) (“Nothing in this section affects the
7 authority of a State or local government to manage the public rights-of-way or to require fair and
8 reasonable compensation from telecommunications providers . . . for use of public rights-of-
9 way”). Even with respect to broadband internet access service (BIAS), the FCC has recognized
10 the states’ role in “policing such matters as fraud, taxation, and general commercial dealings,”
11 Declaratory Ruling, Report, and Order, and Order, *Restoring Internet Freedom*, 33 FCC Rcd. 311
12 ¶ 196 (2018), “remedying violations of a wide variety of general state laws,” *id.* ¶ 196 n.732, and
13 “enforcing fair business practices,” *id.* ¶ 196.

14 For another, the Act contains numerous express preemption provisions. *See, e.g.*, 47
15 U.S.C. §§ 223(f)(2), 230(e)(3), 253(a), 253(d), 276(c), 543(a)(1), 544(e), 556(c). “Congress’s
16 enactment of a provision defining the pre-emptive reach of a statute implies that matters beyond
17 that reach are not pre-empted.” *Cipollone v. Liggett Group, Inc.*, 505 U.S. 504, 518 (1992). Some
18 of these express preemption provisions, moreover, are predicated on the assumption that states
19 generally have the concurrent authority to regulate interstate communications, even if the Act
20 displaces that authority in specific cases. For example, the Act prohibits state laws that “prohibit
21 or have the effect of prohibiting the ability of any entity to provide any interstate [...]”
22 telecommunications service” in 47 U.S.C. § 253(a) and grants authority to the FCC to preempt
23 such laws on a case-by-case basis in 47 U.S.C. § 253(d). These provisions would be unnecessary
24 if states were already categorically precluded from regulating any interstate communications,
25 which includes interstate telecommunications services.

26 Concurrent federal and state authority to regulate interstate communications is also
27 consistent with the general principle of federal preemption law that state authority is maintained
28 when Congress decides to regulate some aspects of a field but not others. In *Virginia Uranium*,

1 *Inc. v. Warren*, 139 S. Ct. 1894 (2019), for example, the Atomic Energy Act gave the Nuclear
2 Regulatory Commission (NRC) broad authority to regulate the nuclear power industry, including
3 the “milling, transfer, use, and disposal of uranium.” *Id.* at 1900. The NRC nevertheless
4 concluded, as the FCC did in this case, that its authority did not extend to one aspect of the
5 field—uranium mining on private land. The Supreme Court declined to find the field preempted
6 in part because it concluded that Congress would not likely have left “both state and federal
7 authorities . . . unable to regulate.” *Id.* at 1903 (plurality); *see also id.* at 1912 (Ginsburg, J.,
8 concurring in the judgment) (“[I]f Congress did not provide for regulation of private conventional
9 mining, it is hard to see how or why state law on the subject would be preempted.”). The Ninth
10 Circuit reached a similar conclusion with respect to the Communications Act in *Ting*. In that case,
11 the FCC exercised its forbearance authority under 47 U.S.C. § 160 to relieve long distance
12 carriers of the obligation to file tariffed rates. The court rejected the argument that such
13 deregulation *also* ousted the states from regulating to protect consumers, reasoning that state law
14 always operated in the background of federal regulation, and the FCC’s act of forbearance
15 therefore “created a much larger role for state law.” *Id.* at 1137. The court found “th[at] fact
16 sufficient to preclude a finding that Congress intended completely to occupy the field.” *Id.*

17 So too in this case, state consumer protection and other state laws co-exist with federal
18 regulation of various aspects of interstate communications. Were this Court to find the entire field
19 of interstate communications preempted, California and other states would be powerless to
20 safeguard public health and public safety and protect their citizens from a wide range of potential
21 harms, from garden-variety fraud to sophisticated violations of their state law privacy rights.
22 There is no evidence that Congress intended to divest the states of such a wide swath of
23 regulatory authority and create regulatory voids—where neither the FCC nor the states could
24 regulate—in areas not expressly regulated by the Act.

25 **II. THE COMMUNICATIONS ACT DOES NOT PREEMPT THE FIELD OF** 26 **INFORMATION SERVICES**

27 Even if Plaintiffs’ field preemption claim were limited to a narrower field—and it is not—
28 the claim still fails. There is no evidence that the Act preempts the fields of interstate information

1 services or interstate broadband internet access service, and significant evidence to the contrary.

2 Information services, “offering[s] of a capability for generating, acquiring, storing,
3 transforming, processing, retrieving, utilizing, or making available information via
4 telecommunications,” 47 U.S.C. § 153(24), are subject to regulation only under Title I of the Act.
5 *See Comcast*, 600 F.3d at 645-46. This category includes online content, and many applications
6 and services, such as email, websites, social media, online gaming, various online video services,
7 and, since 2018, broadband internet access service. As described above, *see supra* at 5-6, the
8 FCC’s regulatory authority under that title is limited to that which is “reasonably ancillary to the
9 Commission’s effective performance of its statutorily mandated responsibilities.” *Id.* at 646
10 (quoting *American Library Ass’n v. FCC*, 406 F.3d, 689, 691-92 (D.C. Cir. 2005)). That limited
11 authority is hardly the kind of “comprehensive[,]” *Kansas*, 140 S. Ct. at 804, or “pervasive,”
12 *Arizona*, 567 U.S. at 399, regulation that ordinarily gives rise to an inference that Congress has
13 intended wholly to occupy the field. It is, in fact, the opposite—a congressional abdication of
14 regulatory authority.⁶

15 To believe that Congress preempted the field of interstate information services, then, one
16 must believe that Congress intended *neither* the federal government *nor* the states to have
17 authority to regulate them. Although “congressional creation of such a regime” may be possible,
18 “to say that it can be created is not to say that it can be created subtly.” *Puerto Rico Dep’t of*
19 *Consumer Affs. v. Isla Petroleum Corp.*, 485 U.S. 495, 501 (1988). Courts will not lightly infer
20 congressional intent to mandate that a field be unregulated by anyone. *See id.* at 503-04 (rejecting
21 the argument that Congress’s repeal of federal regulation left in place field preemption that
22 precluded state regulation to fill regulatory void); *Sprietsma v. Mercury Marine, a Div. of*
23 *Brunswick Corp.*, 537 U.S. 51, 68-70 (2002) (finding no field preemption in federally unregulated
24 field absent “clear and manifest” evidence of congressional purpose). As in any case, “[e]vidence

25 _____
26 ⁶ The only express references in the 1996 Act to information services are found in the
27 context of regulating *other* aspects of interstate communications. *See, e.g.*, 47 U.S.C. §§ 251(g)
28 (interconnection); 259(a) (local loop unbundling); 1002(b)(2) (assistance to law enforcement).
One section, 47 U.S.C. § 230(c), (d), regulates interactive computer services, which can in some
cases include information services, *see id.* § 230(f)(2).

1 of pre-emptive purpose is sought in the text and structure of the statute at issue,” *CSX Transp.,*
2 *Inc. v. Easterwood*, 507 U.S. 658, 664 (1993), and not in hypothesized “abstract and unenacted
3 legislative desires” that cannot be found in the statute itself. *Virginia Uranium*, 139 S. Ct. at 1907
4 (plurality op.). Plaintiffs can point to no convincing evidence—subtle or otherwise—that
5 Congress intended to leave information services completely free from state or federal regulation,
6 leaving behind “a pre-emptive grin without a statutory cat.” *Isla Petroleum*, 485 U.S. at 504.

7 We begin with the text, structure, and history of the Telecommunications Act of 1996,
8 Pub. L. 104-104, 110 Stat. 56 (“1996 Act”), which defined “information services” for the first
9 time in federal law, *see* 47 U.S.C. § 153(24), but does not directly regulate them or give the FCC
10 any direct authority over them. Nothing in the text or legislative history of the 1996 Act says
11 anything about preemption with respect to information services.

12 This statutory silence speaks volumes compared to the range of express preemption
13 provisions elsewhere in the 1996 Act, which carefully calibrate federal-state responsibilities,
14 often striking different balances. Some provisions give the FCC “exclusive jurisdiction,” *e.g.*, 47
15 U.S.C. §303(v). Others couple an express preemption provision with multiple savings clauses,
16 *e.g.*, *id.* §§ 223(f)(2), 253(a)-(d). Some directly preempt state law, *e.g.*, *id.* § 303(v), while others
17 authorize the FCC to do so case by case after notice and comment, *e.g.*, *id.* § 253(d). Legislative
18 history suggests that these provisions were extensively negotiated. *See, e.g.*, Def. Br. 30 & n.28.
19 Against this statutory backdrop, Congress’s silence on preemption of state regulation of
20 information services forecloses any inference that Congress meant to preclude the states from
21 using their preexisting regulatory authority to regulate them.

22 Indeed, the 1996 Act went even farther, specifically forbidding courts and agencies from
23 implying preemption by anything in the 1996 Act other than its express preemption provisions. In
24 a section entitled “No implied effect,” the 1996 Act states: “This Act and the amendments made
25 by this Act shall not be construed to modify, impair, or supersede Federal, State, or local law
26 unless *expressly* so provided in such Act or amendments.” Pub. L. No. 104-104 § 601(c)(1), 110
27 Stat. 56, 143 (codified at 47 U.S.C. § 152 note) (emphasis added). As the conference report
28 accompanying the bill explains, § 601(c)(1) “prevents affected parties from asserting that the bill

1 impliedly preempts other laws.” H.R. Rep. No. 104-458, at 201 (1996).

2 Consistent with the statutory text and legislative history, courts have held that § 601(c)(1)
3 prohibits implied preemption, of which field preemption is one variety. In *GLAAD*, for example,
4 the Ninth Circuit held that even though the 1996 Act enacted several requirements related to
5 closed captioning of video, § 601(c)(1) “signifies that Congress did not intend to occupy the
6 entire legislative field of closed captioning.” 742 F.3d at 428. Other courts are in accord. *See, e.g.*,
7 *Farina v. Nokia Inc.*, 625 F.3d 97, 121 (3d Cir. 2010); *Pinney v. Nokia*, 402 F.3d 430, 458, 459
8 (4th Cir. 2005); *Verizon Md., Inc. v. Global NAPS, Inc.*, 377 F.3d 355, 372, 378, 380 (4th Cir.
9 2004); *AT&T Comm’cns of Ill. v. Ill. Bell Tel. Co.*, 349 F.3d 402, 410 (7th Cir. 2003); *City of*
10 *Dallas, Tex. v. FCC*, 165 F.3d 341, 348 (5th Cir. 1999); *cf. Abrams v. City of Rancho Palos*
11 *Verdes*, 354 F.3d 1094, 1099 (9th Cir. 2004) (holding that § 601(c)(1) precludes finding that 1996
12 Act forecloses remedies under 42 U.S.C. § 1983), *rev’d on other grounds, City of Rancho Palos*
13 *Verdes v. Abrams*, 544 U.S. 113 (2005). In this case, any preemption of information services must
14 arise solely from the operation of the 1996 Act that added the term and its accompanying
15 regulatory scheme. But as the Ninth Circuit has held, that statute precludes any such implied field
16 preemption.

17 To the extent Plaintiffs suggest that preemption can be found in policy statements in the
18 1996 Act that are unmoored from specific authority, *see* ISP Br. 4 (citing 47 U.S.C. § 230(b)),
19 section 601(c)(1) applies *a fortiori* to bar such preemption. But even on their own terms, those
20 policy statements do not give rise to any inference of preemption. Section 230(b) states that it is
21 “the policy of the United States” “to preserve the vibrant and competitive free market that
22 presently exists for the Internet and other interactive computer services, unfettered by Federal or
23 State regulation.” 47 U.S.C. § 230(b). That statement of policy says nothing about preemption. It
24 is found, moreover, in the Communications Decency Act, a portion of the 1996 Act, in a
25 provision focused on blocking and screening of offensive material by providers of “interactive
26 computer services,” *id.* § 230(f)(2), and states the policies that animate the substantive provisions
27 of that section, *see id.* § 230(c), (d), (e). It is implausible that Congress would choose a provision
28 about regulations on blocking and screening of offensive material by providers of one service—

1 interactive computer services—to express an intent categorically to preempt any state regulation
 2 of a different service—information services.⁷ Moreover, as the D.C. Circuit has held, net
 3 neutrality rules are entirely consistent with the policies announced in section 230(b), which also
 4 include “promot[ing] the continued development of the Internet and other interactive computer
 5 services” and “encourag[ing] the development of technologies which maximize user control.”⁸

6 Finally, field preemption of interstate information services is inconsistent with the long
 7 line of cases limiting the scope of the FCC’s preemption authority for both “enhanced services,”
 8 the non-statutory forerunner to “information services,” and “information services” to instances in
 9 which the FCC had ancillary authority to regulate these services. *See, e.g., NARUC II*, 533 F.2d at
 10 615-17; *Mozilla*, 940 F.3d at 75-86; *see also* *Mozilla Professors’ Br.*, at 6-10, 18-21.⁹ In *Mozilla*,

11 ⁷ *Amici Curiae* Communications Law Scholars in support of Petitioners’ reliance (Br. at
 12 14-15) on section 706 of the 1996 Act, Pub. L. No. 104-104 § 706, 110 Stat. 153 (codified at 47
 13 U.S.C. § 1302), fares no better. Section 706 too is subject to § 601(c)(1) and says nothing about
 14 preemption. It states only that state and federal agencies shall “encourage the deployment on a
 15 reasonable and timely basis of advanced telecommunications capability to all Americans,”
 “promote competition in the local telecommunications market,” and “remove barriers to
 infrastructure investment.” None of these evince congressional intent to occupy the field of
 interstate information services, and net neutrality rules are consistent with these policies. *See*
infra note 8.

16 ⁸ As the D.C. Circuit has held, net neutrality rules fulfill these objectives by fostering
 17 investment in broadband infrastructure and in internet content, applications, and services and
 18 prevent broadband internet access service providers from distorting competition among internet
 19 content, applications, and services. *See United States Telecom Ass’n v. FCC*, 825 F.3d 674, 707-
 08 (finding the FCC’s 2015 *Open Internet Order* consistent with policies of § 230), *id.* at 734
 (same with respect to § 706); *Verizon v. FCC*, 740 F.3d 623, 628, 634, 644 (D.C. Cir. 2014)
 (holding that net neutrality rules are consistent with § 706).

20 ⁹ The Eighth Circuit cases upholding preemption of interconnected voice-over-IP (VoIP),
 21 which the FCC has declined to classify, are not to the contrary. Unlike most information services,
 22 the FCC has broad statutory authority (under Title II) or ancillary authority (under Title I) over
 23 the service, since interconnected VoIP competes with traditional telephony. The FCC has used
 24 that authority to impose extensive regulations. *See, e.g., FCC, Voice over Internet Protocol*
 (December 30, 2019), <https://www.fcc.gov/consumers/guides/voice-over-internet-protocol-voip>.
 In *Minnesota Pub. Utils. Comm’n v. FCC*, 483 F.3d 570 (8th Cir. 2007), which upheld the FCC’s
 25 express preemption of certain state VoIP regulations, no party contested the FCC’s assertion of
 26 authority over the interstate aspects of the service. *See In the Matter of Vonage Holdings Corp.*,
 19 F.C.C. Rcd. 22404, 22425 n.118, 22411 n.46 (2004). The holding itself addressed the other
 27 requirements of the impossibility exception, 47 U.S.C. § 152(b), with respect to that service. *See*
id. at 577-581. Based on a misreading of this precedent, *Charter Advanced Servs. (MN), LLC v.*
 28 *Lange*, 903 F.3d 715 (8th Cir. 2018) concluded that state regulation of interconnected VoIP was
 preempted, and observed, without further analysis, that “state regulation of an information service
 conflicts with the federal policy of nonregulation.” *Id.* at 719. Despite the sweep of that *dictum*,
 the holding of the case is specific to conflict preemption of interconnected voice-over-IP. Neither

1 the D.C. Circuit vacated the entirety of the FCC’s 2018 preemption order, which covered both
2 interstate and intrastate broadband internet access service. *See* 940 F.3d at 74 (describing scope of
3 FCC’s preemption order). In so doing, the court reaffirmed the proposition that the FCC could
4 only preempt the states based on ancillary authority, which was lacking in that case. *See id.* at 75;
5 *see also Comcast*, 600 F.3d at 654. If the 1996 Act had impliedly preempted the field of interstate
6 information services, the FCC would not have needed ancillary authority to preempt state
7 regulation of the interstate aspects of broadband internet access service.¹⁰

8 Similarly unpersuasive is any claim that Congress could not have intended to subject
9 information services—or even broadband internet access service, specifically—to a patchwork of
10 state regulations. For one thing, that argument can be made in nearly every field of interstate
11 commerce, and yet courts find field preemption only “rare[ly].” *Kansas*, 140 S. Ct. at 804. Courts
12 routinely refuse to imply field preemption simply from the fact that uniformity may be preferable.
13 *See, e.g., Virginia Uranium*, 139 S. Ct. at 1907 (plurality op.); *NARUC II*, 533 F.2d at 619 (“It
14 matters not whether we or the FCC believe that one national laboratory would be better than 50
15 separate schemes of regulation.”). For another, to the extent that one state’s rules interfere with
16 another’s, the Dormant Commerce Clause is a backstop; it limits the extraterritorial reach and
17 interstate effect of all state laws, ensuring that a state’s regulations go no further than necessary to
18 vindicate its sovereign interests in protecting its economy and citizens. *See, e.g., GLAAD*, 742
19 F.3d at 428 (analyzing validity of state law regulating interstate communications under the
20 Dormant Commerce Clause); *Quik Payday, Inc. v. Stork*, 549 F.3d 1302, 1307-13 (10th Cir.
21 2008) (same).

22
23
24 _____
case suggests field preemption of *all* information services.

25 ¹⁰ Contrary to Plaintiffs’ claims, neither *Mozilla*’s holding nor its reasoning was limited to
26 intrastate service. *Mozilla* vacated the FCC’s entire preemption order because the FCC lacked
27 ancillary authority to preempt the states and could not rely on the impossibility exception for lack
28 of ancillary authority over the interstate aspects of BIAS. That the FCC also preempted state
regulation of intrastate BIAS in violation of §152(b) was an *additional* problem with its
preemption order, not the only or dispositive problem.

1 **III. IT IS IRRELEVANT WHETHER THE INTERSTATE AND INTRASTATE**
 2 **ASPECTS OF BROADBAND INTERNET ACCESS SERVICE CAN BE**
 3 **SEPARATED**

4 As described above, the Communications Act does not impliedly preempt the field of
 5 interstate communications or interstate information services. Instead, it leaves the states’
 6 preexisting police powers in these areas intact—subject to express preemption by the Act or the
 7 FCC acting within the scope of its delegated authority, subject to preemption of narrower fields
 8 and to actual conflicts with federal law, and subject to the Dormant Commerce Clause.
 9 It therefore is irrelevant whether it would be impossible for California to regulate only the
 10 intrastate aspects of broadband internet access services.¹¹ Plaintiffs, moreover, have not submitted
 11 sufficient evidence at this stage of the litigation to support the factual premise—that intrastate and
 12 interstate aspects of broadband internet access service cannot be separated. *See Towerly v. Brewer*,
 13 672 F.3d 650, 657 (9th Cir. 2012) (“A preliminary injunction should not be granted unless the
 14 movant, by a clear showing, carries the burden of persuasion.”) (citation and quotation marks
 15 omitted). The only source of evidence the US cites are the FCC’s declarations in the express
 16 preemption portion of its order, which the D.C. Circuit vacated. *See* FCC Br. 22. Accordingly, at
 17 the very least, this Court cannot determine at this early stage that Plaintiffs are likely to succeed
 18 in avoiding the strictures of section 152(b).¹²

19 ¹¹ Congress expressly limited the FCC’s authority to regulate intrastate communications in
 20 47 U.S.C. § 152(b), preserving the states’ preexisting authority to regulate in this area. This
 21 jurisdictional bar is subject to a judicially created doctrine called the “impossibility exception.”
 22 *See, e.g., Mozilla*, 940 F.3d at 76-77. Plaintiffs attempt to invoke the “impossibility exception” to
 23 overcome this limitation on the FCC’s authority, arguing that it would be impossible for the
 24 Commission to separately regulate only the interstate aspects of broadband internet access
 25 service. US Br. 24. This position is directly contradicted by the case law. Starting with the
 26 Supreme Court in *Louisiana Pub. Serv. Comm’n v. FCC*, 476 U.S. 355 (1986) (*Louisiana PSC*),
 27 courts applying the impossibility exception have consistently held that lawful authority to act is a
 28 prerequisite to applying this exception. As *Mozilla* held, this requirement is missing here. *See* 940
 F.3d at 77-78. *See also, e.g., Louisiana PSC*, 476 U.S. at 375 n.4 (noting that FCC “acted within
 its authority”); *Mozilla*, 940 F.3d at 76-78 (“[T]he impossibility exception presupposes the
 existence of statutory authority to regulate; it does not serve as a substitute for that necessary
 delegation of power from Congress.”); *California*, 905 F.2d 1217, 1239, 1240 n.35 (holding that
 FCC has to act within “its own lawful authority over interstate communications” for impossibility
 exception to apply and evaluating that FCC’s ancillary authority existed. *See id.* at 1239, 1240
 n.35); *Mozilla Professors’ Br.* 11-18.

¹² The US claims “[o]n its face, SB-822 does not purport to limit its reach only to

CONCLUSION

The Court should deny Plaintiffs’ motions for a preliminary injunction.

Dated: September 30, 2020

Respectfully submitted,

/s/ Michael J. Burstein
