Problem [REDACTED] received a call from the FAA Pontiac airport that aircraft were receiving IX on 120.5 Mhz and they
Description: thought it was coming from [REDACTED] and maybe a cable leak

RULE VIOLATIONS

WORK EVENTS

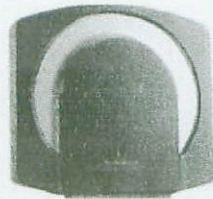

Event Date	Agent	Event Type	IN	OUT	Travel Cost	Problem Resolution
10/18/2006	[REDACTED]	OPEN		0.5		[REDACTED] received a call from the FAA Pontiac airport that aircraft were receiving IX on 120.5 Mhz and they thought it was coming from [REDACTED] and maybe a cable leak.
10/18/2006	[REDACTED]	ON SCENE		4.0	\$0.00	[REDACTED] located source of the IX to [REDACTED] Mr. [REDACTED]. After contacting the owner of the residence and with the neighbors help found and turn off the device causing the IX. Told the owner not to use that device (Radio Shack Amplified AM/FM antenna) again he indicated to me that he was going to return it to Radio Shack and it would not be used again Contacted the local FAA to tell IX was located and turned off.

Reception at its greatest

The High-Gain Amplified AM/FM Antenna is engineered to deliver superb AM/FM reception. It's stylish and it allows you to hear fringe stations more clearly. Even the weakest of FM signals are increased in strength because of the built-in low noise, high-gain amplifier. The results from this dramatically improve signal reception while reducing unwanted noise. This antenna features adjustable gain control with lighted indicator for boosting weak signals and reducing feedback from strong stations. Most of all, you can listen to your favorite radio stations through your home stereo or A/V receiver.

- Boosts weak signals and reduces feedback from strong signals
- Complements any decor

What's in the box

- AM/FM Antenna
- AC Adapter
- Stand
- Mounting screws (2)
- 75 Ohm/300 Ohm Matching transformer
- User's guide

It did not perform as expected. The old style wire antenna worked much better. Returned to store for refund.
LANCEN - FORT WORTH 10/06/06

I find the length of positioning cable to be inadequate. The antenna needs to be farther away from the receiver/interference. Due to the relatively short length I'm unable
