Hey Liane, hope ail is well. We learned a few lessons bringing Michigan on so we updated the Tech Spec with a few diagrams that should help your programmers. See Attached. Let me know how things are going when you get time.

Ha! I can check for an update when I get back into the office on 2/9 but for now we are in a sole source procurement which was approved. Money is there at our Honolulu Police Dept.

Hi Liane,

I am getting questions from management on where Hawaii is in the process of the procurement and transfer of the facial recognition. What can I tell them to shut them up! ha ha. Let me know when you get a chance. Thanks.

Liane, No worries!

Just remember that the IPSFRP connectivity is over the CJIS WAN line and make sure your tech guys read the tech spec that I sent. Let us know how things are going and shout me if you need anything from us.

Hi Justin,

Oh my, I was just checking my pending stuff and I realized that I may not have responded to your email! ☹ I'm so sorry.

Anyway, Happy New Year!

We are still working with HPD (Honolulu Police Department) on the Facial recognition system procurement and transfer to the State, so we will keep you posted.

Anything we should be doing in the meanwhile?

Thanks,

Liane

Liane,

I hope you are having a great New Year so far..... Our system is almost ready to pilot so let's get this started!

A few things, I have attached the latest version of the Interstate Photo System Facial Recognition Pilot (IPSFRP) Technical Specification document that outlines the new Types of Transactions, mandatory codes, and essential email address (this is a CJIS Wide Area Network [WAN]) remind your vendor/programmers that all transactions must go over

the CJIS WAN not over the Internet. We have had trouble with other states trying to connect over the Internet.

Once your programmers have a chance to review the Tech Spec and do the minor programming we will try running some test records.

On our end, we will need your CJIS WAN public IP address/ORI/email address that HI will be using to send/receive the FR transactions so we can open our firewalls here.

Anyway, if you or your programmers have any question, feel free to give me a shout. We look forward to piloting with HI.

Justin C. Cook
