What's a Google Account?

It's a unified login system that gives you access to:

- Free Google services, including iGoogle, Gmail, Google Groups, Picasa, Web History, and [more](#).
- AdWords and Google Checkout.

If you've used any of these services before, you already have a Google Account. Your account username is simply the email address you used during the creation process.

If you don't have a Google Account, you can [create one now](#).

A note about Gmail: Creating a Google Account won't automatically give you a Gmail account, nor will it affect your current emailing capabilities. Creating a Gmail account, however, does automatically allow you to sign in to any of the services mentioned above. Just enter your Gmail username and password.
